

UK PASSIVHAUS OPEN DAYS 2014

7 - 9 November

Town Planners, Paul and Lisa Jackson gained consent for a new house designed by themselves, in November 2010. The Passivhaus has been occupied since March 2013. It is zero carbon with solar PV array, and makes a small annual surplus with FIT and RHI.

Architect Peter Smithdale of Constructive Individuals and Energy Consultant Roderick Williams supported the Touchwood team; An English company, who create bespoke airtight homes using structural timber 'I' beams. The house was the first certified Passivhaus in Wiltshire.

WHEN

FRI 7 10am-2pm
