This is a construction site. Not suitable for children. Please dress appropriately & bring safety gear.

Retrofit of a dilapidated early '60s box of a house in south Manchester into a twenty-first century living aiming for EnerPHit. The client's brief remodelled the fabric, but remained true to the original house, and be simple and affordable. Works include external wall insulation, roof insulation at rafters level and floor insulation above the existing slab. In addition, a new-build timber frame extension is added at the rear of the property.
